

Data Science Homework #2

Due Date: September 1

Name: _____

Credit: ☐ Full Credit ☐ Half Credit

Question: Assume you have a dataset loaded into Python called `students` regarding all of the students in our data science class. There are columns then called `name`, `major`, and `age`. In each of the three boxes below, hand write code for the following prompts: (1) the code to select just the row of data associated with you, (2) the code to select the 5 students with the lowest GPA, and (3) the code to select all History majors. Provide these as separate method chains below
