

## Data Science Homework #5

**Due Date:** September 17

**Name:** \_\_\_\_\_

**Credit:** ☐ Full Credit    ☐ Half Credit

**Question:** Below, are three boxes each for the prompts here. First, draw a scatterplot with 4 points in which each point is a person. One person should be you. The others can be friends, family, or famous living people. Make the x-axis the person's age in years and the y-axis the name of the state or country where they were born (yes, the y-axis can be a categorical variable). Second, create the data to produce this plot in a hand-written table. Finally, write the Python code that would produce your plot from the data.
